Applicant's election without traverse of Group III, claims 123-128, in the reply filed on 11/7/05 is acknowledged.

This application is a CIP of the parent case, please inform the examiner as to how this application differs from the parent application. And please update the specification regarding the status of the allowed parent case. And please inform the examiner of any related cases, pending, allowed or abandoned.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The specification as originally filed does not contain written description for a kit. And no kit is disclosed in parent patent 6,670,113 which calls into question the proper priority date of the present application. No priority is granted at this time.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
